## New Mexico ISP installs MeshDynamics' Wi-Fi in resort town

By RCR Wireless News on AUGUST 7, 2006

Archived Articles, Network Infrastructure

As EarthLink Inc. prepares to unwire Pasadena, Calif., using gear from Tropos Networks Inc. and Motorola Inc., another vendor is celebrating the deployment of its Wi-Fi mesh network equipment in Red River, N.M., where Enchanted Circle Communications launched a wireless broadband network using equipment from Santa Clara, Calif.-based MeshDynamics.

Situated about 20 miles south of the Colorado border, Red River has about 2,500 homes, most of which house part-time vacationers who don't need year-round services, preferring to pay for Internet access during visits. To meet this part-time demand, Enchanted Circle Communications L.L.C. recently began offering usage packages based on individual needs. But it hasn't been easy setting up the network in
